Particulars of the Harvard-Yale Row-ing Match. NEW LONDON, June 27.—The University out race resulted in an easy victory for the Harvards. Owing to rough water no start was made till twenty-five minutes past seven. The Yales caught water first and at the end of a half-dozen strokes gained a slight ad rantage, both going at 40 strokes, but the Yales' lend was only temporary and a dozen powerful strokes by the Harvards forged their boat ahead in line with the Yales. At the half mile the Harvards were a good length in the lead which the Yales spurted manfully lessen, and did succeed in diminishing a ew feet, but this effort seemed to consum all the bottom there was in their boat, so that from this point out it was merely a question as to how great a distance the Harvards would be ahead at the finish. Meetings Held by the Weavers and Spinners, at Both of which a Determination to Hold Out Against Last Year's Reduction of Wages is Manifested-Relief Asked from the City.

A Series of Denunciatory and Indirectly Threatening Resolutions Adopted by the Weavers, Holding the City Authorities Responsible for all the Trouble-Other Meetings Appointed for To-Day.

FALL RIVER, June 27 .- The weavers held a large meeting in the spinners' hall to night, but the intense heat confined it to one hour's duration. Short speeches were made by some of the old stand-bys of the opera tives, and the hope was expressed that the spinners would stand firm until the manufacturers yielded. The sentiment of the meeting seemed to be that the weavers should assist the spinners, but it was voted that the resolution given below touching this point be laid on the table until the massmeeting in the park to-morrow, when it is are the resolutions:

Resolved. That as a large number of weavers are thrown upon the streets, and the remainder are likely to follow in a few days, and as the small pittance received as wages rendered it impossible to save anything, therefore we are compelled to seek relief from the city, especially those who have families; these we advise to do so at once, and not allow their children to go hungry.

Resolved, That as the weavers are thrown upon the streets through the selfishness of the manufacturers, who have compelled us to share in the depression in business to the extent of forty five per cent. reduction in our wages, and who now refuse to give us the least share in the present prosperity of the cotton trade, therefore it is but just that the wealth of the city, created entirely by the operatives, should now be required to furnish means to prevent suffering among us, and we shall hold said authorities responsible for all distress that may take place through their negitience and refusal to relieve.

Resolved, That we hold up to public contempt and executation the action of the manufacturers in discharging the most distant relatives and friends of the spinners, old and young, cousins, netces and aunts, even though they live and work in other parts of the city, there being a large number in the Grantie mill alone.

Resolved, That the thanks of the weavers be extended to Aldermen Leonard, Connelly and Sweeney for their action in refusing to confirm a large number of the manufacturers toadies as special policemen in the present peaceable condition of the city, as such a body would irritate the people and cause a disturbance; and we express our utmost detestation for Alderman M'Creary for offering a motion to close the office of the overseer of the poor to prevent the people from ebitaining relief.
